Discussion

Removal of portions of the north wall of Room 152 Vault, B776, RCRA Unit 90.85 Mixed Residue Storage Area

I called James Hindman on August 11, 2000 to request permission to open a seven feet by seven feet opening in the wall between Room 152 (north end) RCRA Unit 90.85 and Room 154 to expedite removal of shelving/storage racks from the Room 152 Pyrochemical Vault. On June 20, CDPHE granted approval to remove all shelving/storage racks in Room 152 Vault without triggering RCRA closure. [Reference: June 20, 2000 Contact Record giving permission to remove shelving/storage racks in Room 152 Pyrochemical Vault.] In order to receive approval, we had to demonstrate that the shelving/racks did not come in contact with RCRA waste. Radioactive monitoring (scans, swipes, smears) were used to demonstrate that the shelves/racks were free of contamination and therefore had never come into contact with hazardous waste. As with the shelving/racks this wall has not been in contact with RCRA waste.

Cutting a "doorway" through this wall will allow IP2 containers to be wheeled into the vault area and expedite removal of the shelving/racks. This action will improve safety as it will greatly reduce the amount of hand carry items and the distance needed to carry the items. Mr. Hindman stated that he needed to review this request and discuss it with Edd Kray.

On August 14, 2000, I received a phone call from Mr. Hindman (at approximately 3:00 p.m.) granting approval for this activity.
